

The Unknown Music Video Plan

Lexy:

Beginning of the song, I come outside trying to stay warm while I'm crossing the street and see to human-like creatures on both sides of the street and one of them starts dancing. Then the other one comes up to me and starts talking (which is the chorus of the song). While I'm confused but start dancing to it as well. We all start dancing and having fun (One angle: Nelly Pooh dancing to the left and Antwon dancing on the other side, they're moving closer as the camera pans to me. I say the man's french part (Me introducing myself to them) and once we all together, we all start dancing). As we're dancing somebody is getting killed in the alley (Flim someone screaming and flick back to the shoes, don't show the actual face of the killer). For the alley scene, somebody running for there life or vlogging.

Wide shot???

Can have a slow-motion walking outside. Just shoot it from the shoes up, only focusing from behind and on side of the person.

Us running away from gunshots. Run different directions then run to Frances's house to see if everyone is okay. Who is doing a wide shot?

Dialogue: Out of breath, asks okay. Asks what happen? Then ask to play video games.

Translation to use playing video games. (My hero one's justice or Just Dance).

Two angles: Of us playing video games (Can we use clips?) Me and Nellypooh playing, somebody wins and cries. The person who loses on the floor dancing while everyone else is up on their feet. Cheer first b4 dancing. Cheer will be in slow motion. (If we play MK11 change blood color). Shot of the popcorn in the air. Shot of munches in the air or candy. Antwon throws food in real-time out of excitement. No individual reaction, group reaction. In slow motion, in real-time. **Are we shooting this scene upstairs or downstairs?**

4 takes of 2 angles. One take of us watching clips from us playing another one of us really playing.

One take of running around teasing Nellypooh. Then another take of us dancing, cheering to the camera (one at a time in the form of a circle) so I can do credit shots. And then we get crazy while it fades to black.

Put the color paper on lights to change colors.

Gotta shoot these videos during sunset or at night
